Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-14, drawn to electronic component mounting method in which a resin is supplied on the circuit substrate.

Group II, claim(s) 15-19, drawn to a circuit substrate unit comprising a resin.

A circuit substrate having a resin thereon is a common technical feature of Inventions I and II. However, Kikuchi et al. (US 5849606) discloses a circuit substrate 21 having a reinforcing resin layer 44 [fig. 1] and so it is not Applicant's contribution over prior art. Thus, circuit substrate having a resin not a special technical feature and claims 1-19 fail to form a single general inventive concept. Therefore, unity of invention is lacking and restriction is proper.

2. A telephone call was made to Bruce Bernstein on 9/15/08 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of an invention to be examined and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.
